Impacts to Downstream Threatened and Endangered Species from Elimination of Pond C 2 Discharge

*George*  
G H Setlock Director  
Environmental Protection Management  
EG&G Rocky Flats Inc

Rocky Flats Office (RFO) has reviewed the draft categorical exclusion recently submitted for the proposal to recycle Pond C 2 water in the plant raw water system and we have identified a concern that must be addressed before the categorical exclusion can be approved. RFO will need to consult with the U S Fish and Wildlife Service (FWS) about any effects that reducing Rocky Flats Plant's surface water discharge may have on threatened or endangered species downstream in the Platte River drainage. Please compile the information necessary to draw conclusions about the possible impacts so that RFO can present this proposal to the FWS for consultation.

As a reminder, no activities that are a part of this project should be undertaken until the categorical exclusion has been approved. We recognize that addressing this downstream depletion issue may cause delays in implementing the project on schedule.
